

SINOPSE

Rodrigo's music is a living experience of the ever-expanding nature of our being.

Led by the desire of bringing forward the divinity of each individual, Rodrigo has been playing in many different locations, from festivals, to Buddhist Monks concerts in the "World Tour for Inner Peace", to nursing homes and companies, all making him an experienced "sounder".

Rodrigo started his life as a musician through meditative concerts. And through this experience he was able to testify the effects of music on people. Not only it had an emotional and mental impact, but also in some cases a physical one. This led him to study Sound Healing, which he now applies in all his work. He embeds very ancient sound techniques into his beautiful melodies to enhance the effects of the ever known sound.

We can say that Rodrigo combines his strong intuition and music ability to offer people an opportunity to connect at a deeper level. His work is always a pleasant and surprising experience on expanding people's perception of music and sound.

Being very difficult to express in words the work of Rodrigo, it is always a journey. **A Journey of experiencing peace, of connecting with something bigger than ourselves,**

of being open to acknowledge information through other means rather than the usual mind perception.

TRAINING AND WORK

Rodrigo started his meditative practice very early, guided by his grandfather and took his first meditative course at the age of 11.

Since then, meditation has been part of his life.

His life as a musician started when he discovered the didgeridoo and started offering meditative concerts, in which he later added other instruments like crystal bowls, harmonium, voice and others. Through this experience he was able to witness the effects of music on people. Not only it had an emotional and mental impact, but also in some cases a physical one.

This led him to study Sound Healing in Sound Healing Institute (USA), where he was able to study with some of the best professionals in the field. He now applies all this sound knowledge in all his work, embedding very ancient sound techniques into his beautiful melodies.
